DETAILED ACTION

Applicant's responses of 27 August 2007 and 21 December 2007 have been received and entered. Claims 1-24, 27-35, 40-41, 44-47, 52-53, 56-57, 60-62 have been canceled. Claims 65-74 have been added. Claims 25-26, 36-39, 42-43, 48-51, 54-55, 58-59, 63-74 are currently pending and under examination.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Any objection or rejection of record which is not expressly repeated in this action has been overcome by Applicant's response and withdrawn.

Applicant's arguments filed 11 October 2006 have been fully considered but are not persuasive.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 25-26, 36-39, 42-43, 48-51, 54-55, 58-59 and 63-74 are rejected under 35 U.S.C. 102(e) as being anticipated by US2003/0027275 (Baker et al.) for the reasons of record as pertaining to the previously filed claims.

Baker et al. teach a polypeptide which is 99.5% identical to the polypeptide of SEQ ID NO:5 (see SEQ ID NO:466). Baker et al. also disclose antibodies (see page 57 at [0795]) including monoclonals ([0796]) and fragments ([0814]). Pharmaceutical compositions are disclosed at page 61 and

Art Unit: 1647

immobilization on a solid support is disclosed at ([0830])). Therefore, the invention is anticipated by the prior art of Baker et al. Applicant has amended some of the claims and has added claims, requiring that the rejection be applied to all the claims.

Applicant argues that the instant application has an effective filing date of April 12, 1999, and therefore, Baker et al. does not qualify as prior art under 102(e). Applicant's argument has been fully considered, but is not persuasive. Baker et al. has priority back to 1997 based on earlier filings (see continuity data on first page of document). See MPEP 901.03 – Under amended 35 U.S.C. 102(e)(1), a U.S. patent application publication under 35 U.S.C. 122(b) is considered to be prior art as of the earliest effective filing date of the published application.

Conclusion

No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory

Art Unit: 1647

period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
